

IT financing solutions for:

The security of your IT infrastructure

Have you been the victim of a cyber-attack on your IT infrastructure? Or you are fearing an attack? Then protect the digital heart of your company with the latest security technology. We have the tailor-made financing concept for you.

Financing of your IT security investments

Whether a firewall, a virtual firewall, licenses or a cloud and subscription solution. Not only do we bring the necessary financing knowledge to the table, but we also provide the required IT knowledge.

Financing the „incidental costs“ of the cyber-attack

A cyber-attack can have nightmarish consequences - and become a bitter reality for you at any time. Digital forensics, recovery of data, threat analyses: These are all associated with high costs. On top of that comes the need for a new security solution. We offer you a financing concept that covers the costs for the cyber-attack and the investments in your future IT security.

Flexible adaptation of the security solution during the term of the contract

Your business models continue to evolve, and your IT requirements are changing by leaps and bounds. With our financing solutions, you have the flexibility to adapt the infrastructure during the term of the contract.

To the point

- > Spread recovery and investment costs
- > Flexibility in terms of duration
- > Efficient from a single source

Miller Leasing - the IT specialists:
